

BOSON LABS

COMPANY OVERVIEW

BOSON Labs (previously called SCUBE) is an open-source research & development organization specialized in building advanced cryptographic products and DeFi solutions.

Just like the internet itself, we are a fully distributed team of 30+ associates spread across the globe (headquartered in Research Triangle Park, North Carolina, USA and Development Center in India).

BLOCKCHAIN PRODUCTS IN PIPELINE – BOSON LABS

Product Name	Description	Platform	Duration	Status
 BLACK COLLATERAL www.blackcollateral.com	An new innovative high store of value cryptocurrency where users are restricted from selling the tokens in large quantities using a novel timelock mechanism	 ethereum	2019-2020	Live

 TREE PLATFORM TBD	TREE is a fine state of the art Enterprise grade Cloud Agnostic DeFi platform that enables all kinds of regulatory compliant financial needs in one place	 Algorand™	2022-2024	Idea

PITCH DECK

THE OPPORTUNITY

01

Cricket is the 2nd famous and revenue generating sport with over 2 billion followers across the globe

02

USA Cricket is gearing up to host several cricket leagues of international standards across NA region.

03

USA Cricket is planning to invest 1 billion dollars towards building cricket sporting infrastructure in the next 5 years

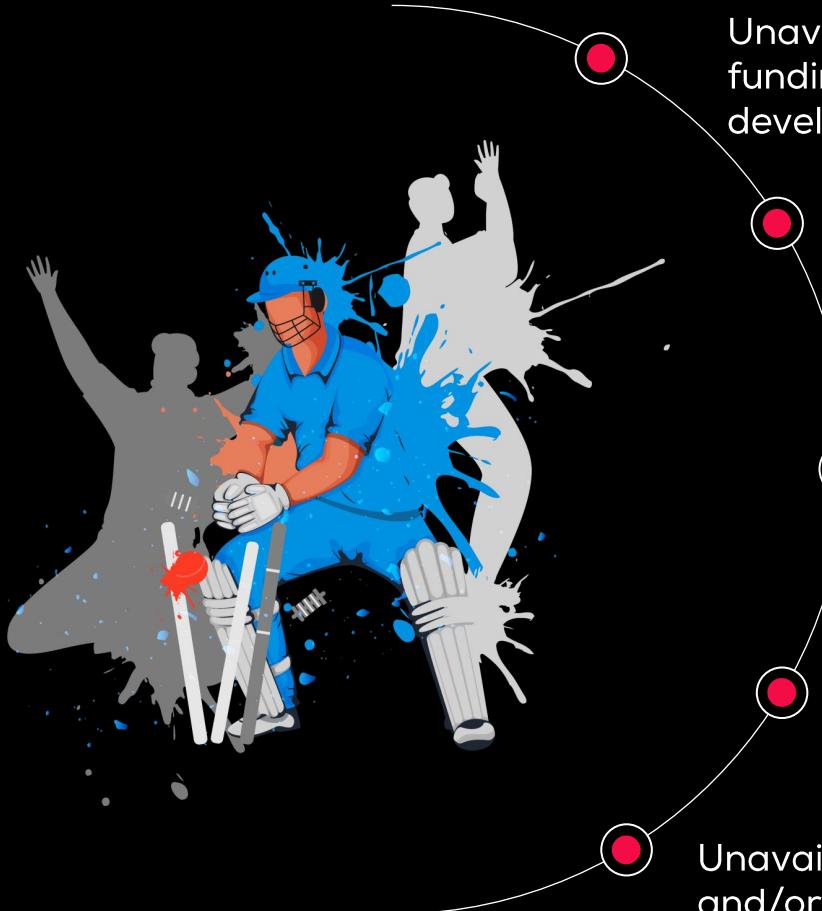

04

In the last 3 years, over 10,000 cricket games/leagues hosted within USA under USA CA umbrella

MAJOR CHALLENGES WITH THE CRICKET SPORT INFRASTRUCTURE

- Unavailability to a reliable and most importantly **regulated** platform to raise funding, host social betting and conduct players auction to assist with cricket sport development or support emerging cricket talents
- Unavailability of a robust platform to issue, manage, capture best moments and trade NFT cricket collectibles. Still, most popular cricket leagues are using traditional trophy concept to appreciate talents
- Unavailability of an interactive platform to reward cricket fans for supporting their favorite teams
- Unavailability of a better platform to encourage fan engagement. No medium to connect fans and league teams in new ways
- Unavailability of a transparent infrastructure to conduct official selections and/or league/team related elections to identify leaderships

CHALLENGES WITH SECURITY & COMPLIANCE

- Lack of transparency over sports-related organizational operations, making it hard to track internal frauds
- Most fantasy gaming Apps and social betting platforms are hosted on centralized servers, making it hard to validate the results.

OUR SOLUTION

CIFI NETWORK

TOKENIZED ENTERPRISE GRADE CRYPTO INFRASTRUCTURE PLATFORM FOR CRICKET

The first multi-dimensional All-in-one NFT, DEFI and betting ecosystem that aligns the interests of cricketing community, fans, sponsors, clubs, players, teams, and rights-holders in one place.

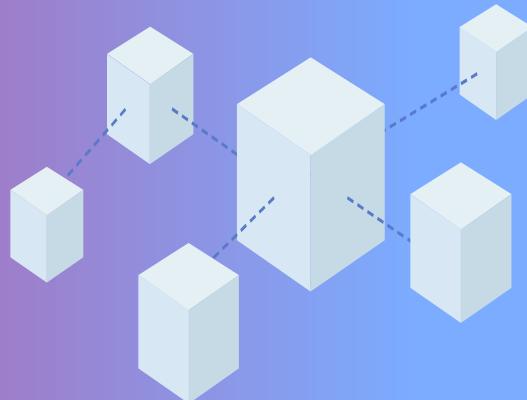

SPORT & GAMING MARKET

PLATFORM CATEGORIES

CIFI LABS

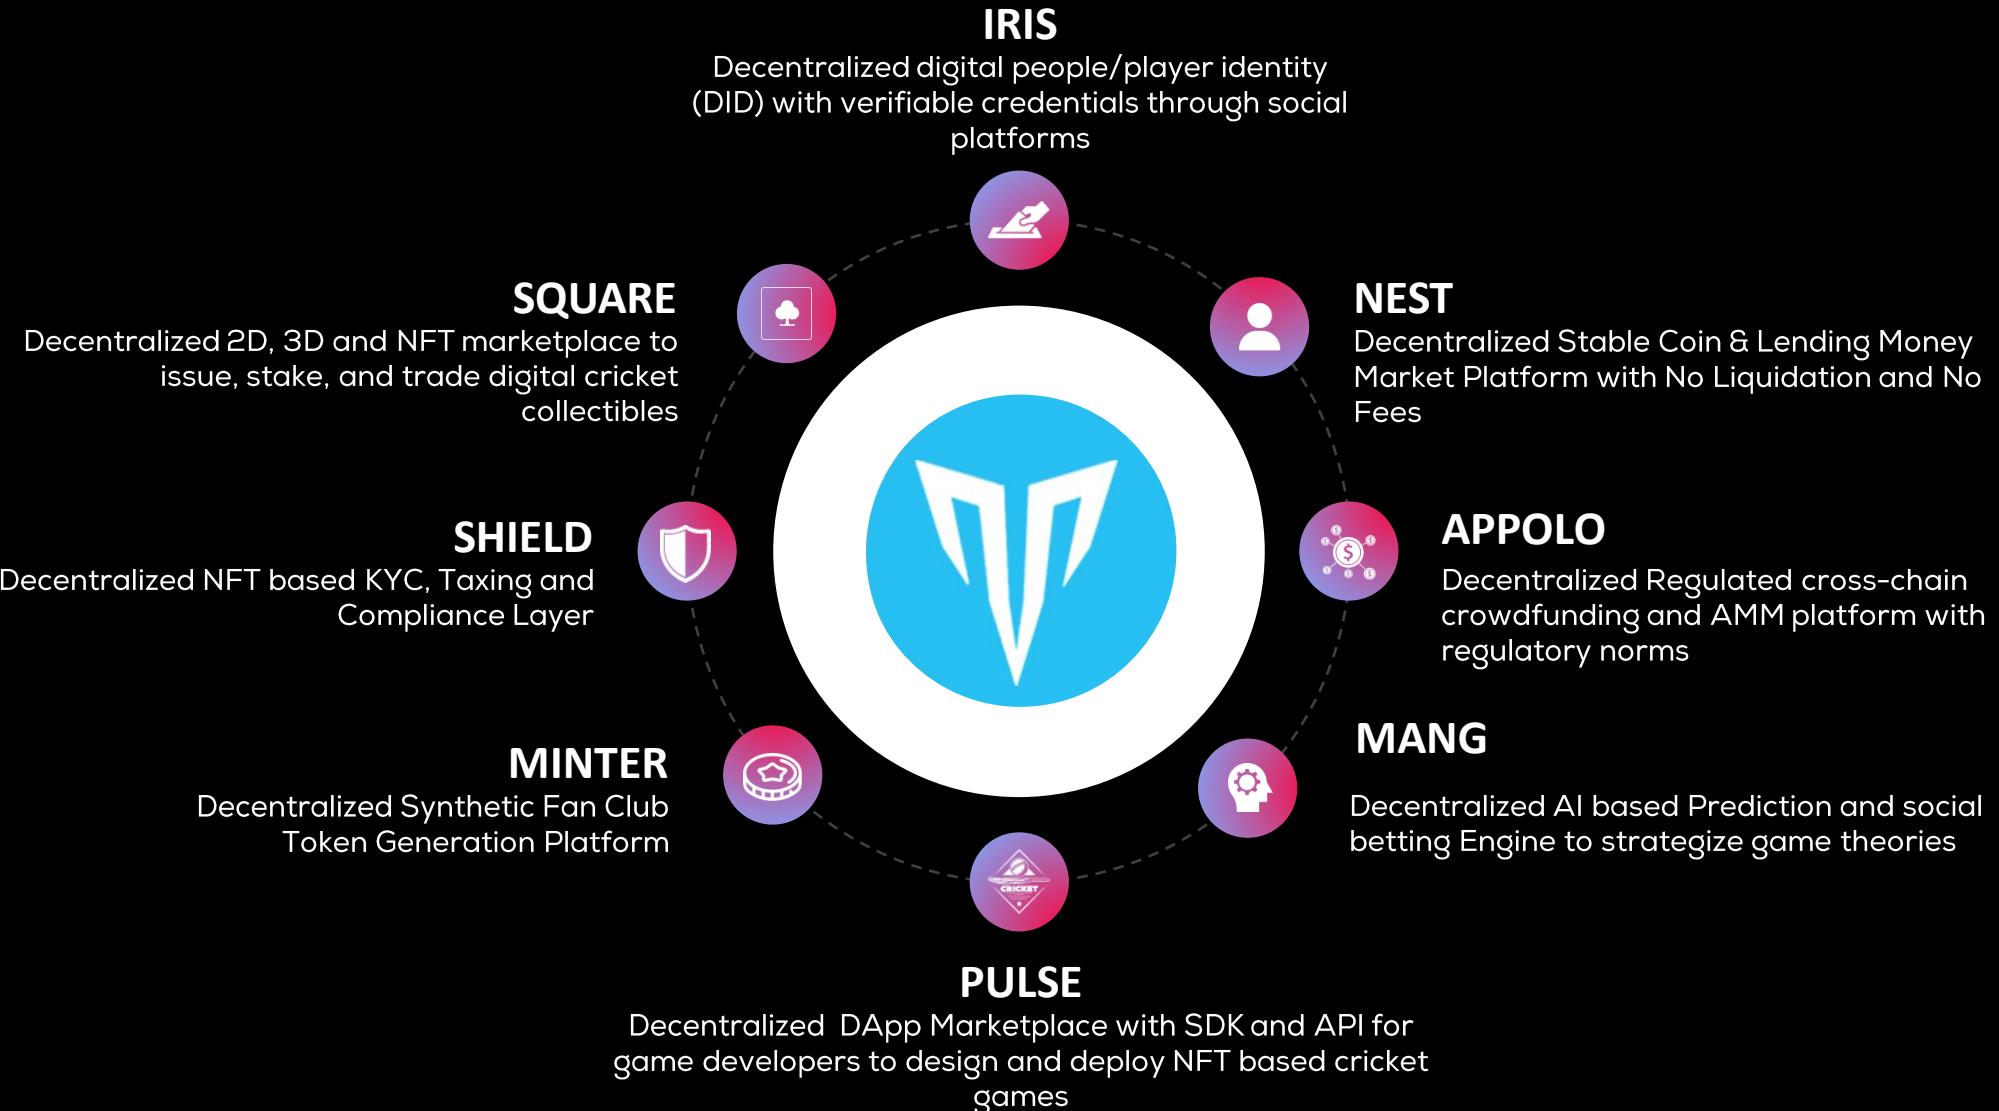

A fine state the art Enterprise-grade generic all-in-one crypto DeFi, NFT, and Gaming platform that the **global community** can use without KYC restrictions

CIFI SPORTS

A **regulatory compliant** All-in-One DeFi, NFT, and Sports infrastructure platform with KYC, DID, and integrated Taxing layers adhering to all the league/county/government crypto regulations.

POTENTIAL GROWTH OPPORTUNITY

- ✓ CIFI Network aim to achieve the first-mover advantage in the cricket industry by building an enterprise-grade all-in-one exclusive crypto infrastructure for all the upcoming USA cricket leagues and for the **2 billion** cricket fans across the globe.
- ✓ World's Top-Class Sports such as Basketball, Soccer, and Baseball have their NFT and crypto infrastructure platform (E.g., NBA Top Shot, Sorare, and Topps). Cricket being the 2nd world-famous sport followed by billions of fans worldwide does not have a quality NFT or crypto App yet

DEVELOPMENT STRATEGY

Boson Labs signed a contract with TCL (a member of USA cricket) to issue NFT based digital cards for all the leagues hosted under the TCL umbrella for the next 3 years (2022-2025)

By 2024, CIFI Platform aim to cover 80% of the premier cricket leagues in USA and will gradually establish its base across other nations.

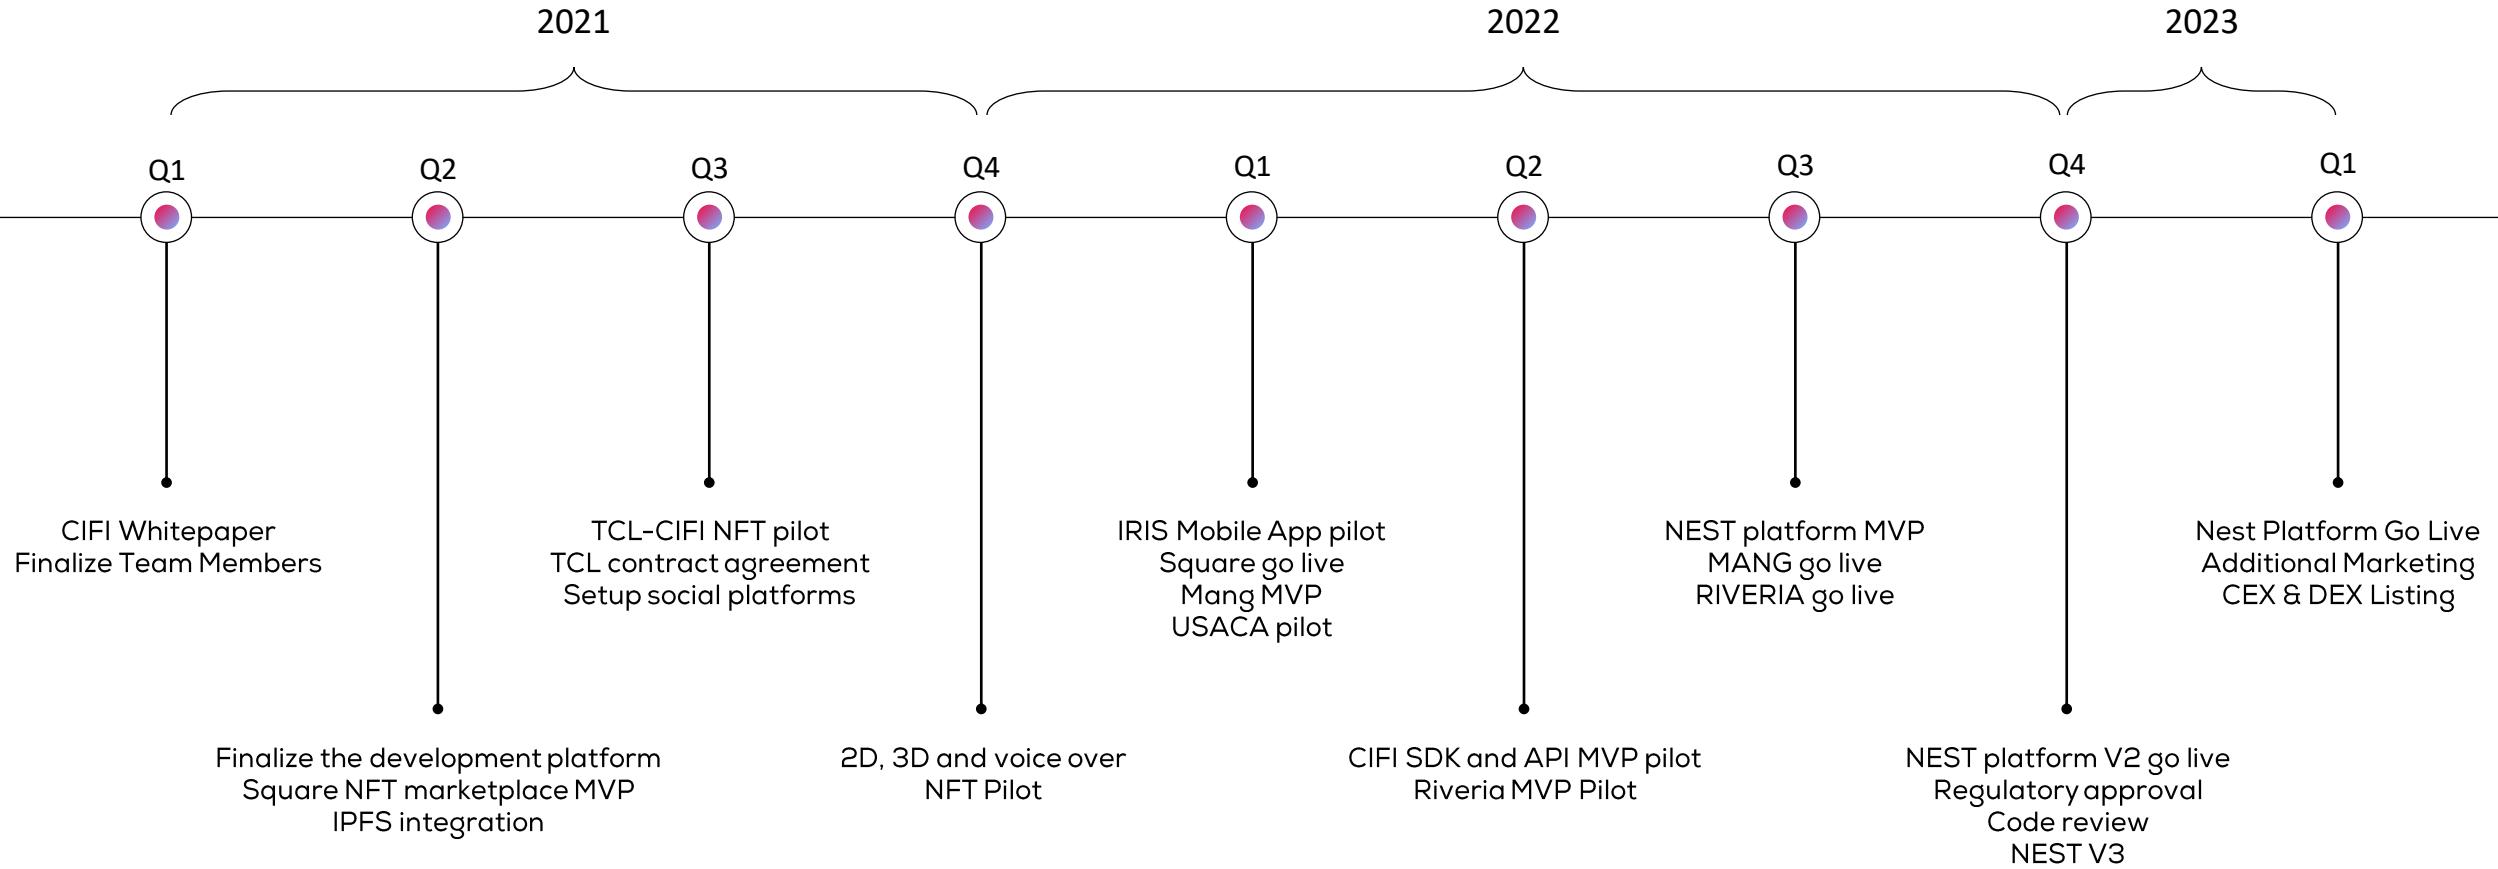

CIFI is planning to mint over 100,000 cricket related NFT assets and close to 10,000 DIDs in the next 5 years.

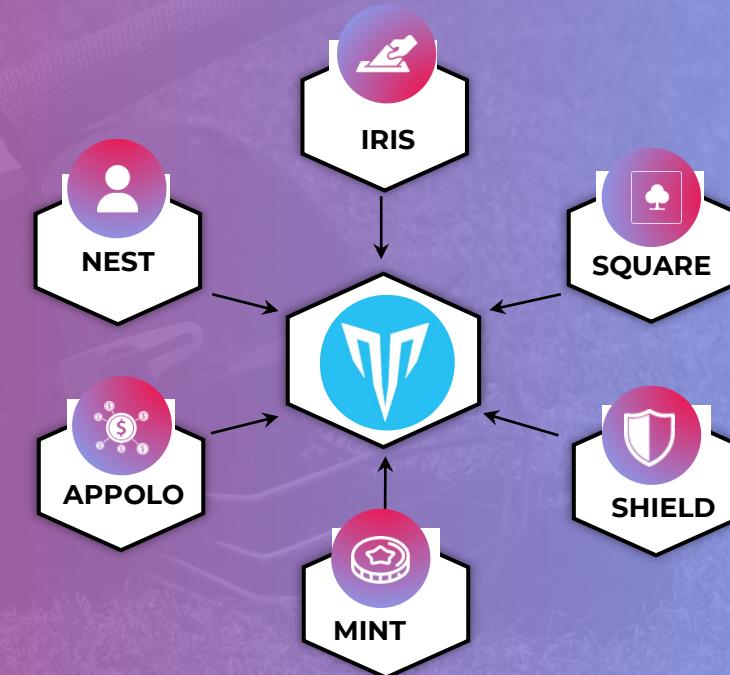

With the help of blockchain, DeFi and smart contracts technologies, CIFI will act as a secure platform to host auction, prediction, election, minting and decentralized staking services for major cricket leagues and global crypto community.

ROADMAP

REVENUE MODEL

- ✓ Transaction Fees (SQUARENFT and DEFI-NEST Apps)
- ✓ License Fees (Apollo Crowd Funding and IRIS)
- ✓ Advertisements Income (Mobile Apps)
- ✓ Hosting Fees (Pulse)
- ✓ Consulting Fees (Minter App)
- ✓ Service Fees (Shield)
